Description

Meet the MAXUS eDELIVER 5, the intelligent, all-electric panel van designed to power your business into a sustainable future. This L1 H1 model, equipped with the robust 64 kWh battery, delivers an impressive WLTP combined range of up to 208 miles, with the city-driving figure extending up to a remarkable 304 miles. Perfect for urban logistics, last-mile delivery, or local service operations, this van ensures you can cover your daily routes with confidence, while the zero tailpipe emissions mean you are ready for any clean air zone. The eDELIVER 5 is built for efficiency without compromising on practicality. The L1 H1 configuration offers a useful cargo volume of 6.6 cubic metres and an excellent maximum payload of 1,200 kg, rivalling its diesel counterparts and outperforming many electric competitors in its class. Accessing the load area is made easy thanks to dual sliding side doors and wide-opening rear barn doors. Inside the cabin, a modern workspace awaits, centred around a high-definition 12.3-inch touchscreen with integrated connectivity like wireless Apple CarPlay and Android Auto. Safety and driver convenience are paramount, with this van featuring a comprehensive suite of driver assistance technologies as standard. This includes Adaptive Cruise Control, Forward Collision Warning with Automatic Emergency Braking, Lane Keep Assist, and a 360-degree camera system to assist with tight city manoeuvres. The vehicle is also equipped with keyless start, rear parking sensors, and a column-mounted shifter, ensuring a smooth, uncluttered, and refined driving experience. Factor in the long manufacturer's warranty on both the vehicle and the battery, and the MAXUS eDELIVER 5 is not just a commercial vehicle; it's a smart, reliable, and cost-effective partner for any forward-thinking business. Price

inclusive of government OZEV grant at £5,000. OZEV grant subject to Government approval and can be changed or withdrawn, without notice, at any time.
