Description

This brand new MAXUS Deliver 9 LUX has covered just 2 miles and is available for immediate delivery, offering an excellent opportunity to secure a high-specification large panel van without the wait for a factory order. Powered by the efficient 2.0-litre D20 diesel engine paired with a manual gearbox and front-wheel drive, the Deliver 9 provides a strong combination of performance, economy, and practicality. The L3 long wheelbase and H2 high roof configuration provide a generous load area, making it ideal for trades, deliveries, logistics, construction, and a wide range of commercial applications. The desirable LUX specification provides an enhanced level of comfort and equipment, creating a more refined working environment for drivers while retaining the robust practicality expected from a large commercial van. The front-wheel drive layout also helps maximise the available load space and provides excellent manoeuvrability. Fully Euro 6 compliant and ULEZ friendly, this delivery-mileage example is perfectly suited to both urban and longer-distance operations. Presented in

excellent condition throughout with just 2 miles, this brand new
Deliver 9 LUX is ready to go straight to work.
