Description

Experience the MAXUS eDELIVER 9 Chassis Cab, the long-wheelbase electric platform designed for maximum versatility and zero-emission operations. This L4 (Long Chassis Cab) model is equipped with the 65 kWh battery, providing a robust, conversion-ready base for specialist body types such as dropsides, tippers, or Luton boxes. It offers a strong foundation with a 4048 mm wheelbase and an impressive overall length of 6680 mm, ready to be tailored to your specific business requirements. The vehicle is powered by a 150 kW (204 PS) electric motor that delivers 310 Nm of torque, ensuring responsive and smooth performance, even when fully laden. While the official combined WLTP range figures for this N2 Chassis Cab variant can vary significantly depending on the final body conversion, the 65 kWh battery generally provides a practical daily range for urban and regional use. A major benefit is the quick DC charging capability, allowing the battery to

charge from 5 to 80 percent in approximately 36 minutes, which minimizes operational downtime. The Chassis Cab configuration boasts a competitive maximum payload (excluding the bodywork) of around 1290 kg, supporting heavy-duty applications. The high-strength chassis frame is specifically engineered for custom body mounting, providing stability and durability for the toughest jobs. The cab area itself is a comfortable and practical workspace, featuring a modern 10-inch touchscreen infotainment system with Apple CarPlay and Android Auto functionality. Standard features on the eDELIVER 9 platform prioritise driver comfort and safety. These include air conditioning, cruise control, a reversing camera with guide assist, and front and rear parking sensors. Furthermore, it incorporates advanced driver assistance systems like Automatic Emergency Braking and Lane Departure Warning, ensuring a safe working environment. The vehicle is also backed by the remainder of MAXUS' comprehensive manufacturer warranty. This eDELIVER 9 Chassis Cab is the ideal choice for businesses looking to electrify their bespoke fleet without compromising on capability or flexibility.
