Description

The MAXUS DELIVER 7 FWD L2 H1 PV is the diesel-powered, front-wheel-drive panel van variant, offering a combination of long wheelbase and standard roof height. It is positioned as a modern and capable mid-sized van, designed to provide a strong balance of performance, payload, and in-cab technology for professional drivers. The DELIVER 7 is powered by a reliable 2.0-liter turbocharged diesel engine, typically delivering around 150 horsepower and a substantial 375 Newton meters of torque through a manual transmission. This robust powertrain ensures the power and efficiency necessary for both urban and long-distance driving. Its combined fuel economy is approximately 35.3 miles per gallon (WLTP), ensuring manageable running costs. The vehicle meets Euro 6 emissions standards. The long wheelbase, standard roof (L2 H1) configuration translates to a long body and a practical height, offering impressive cargo capabilities. The van's exterior length is 5,372 millimeters and its height is 1,999 millimeters. Inside,

the load area boasts a length of 2,913 millimeters and a width of 1,800 millimeters, narrowing to 1,390 millimeters between the wheel arches. The cargo volume for this variant is around 7.2 to 9.2 cubic meters, depending on the exact model details. Crucially, the maximum payload capacity is a robust 1,220 kilograms, and it has a braked towing capacity of up to 2,000 kilograms. The load area includes a steel cargo floor, and access is provided by a single sliding side door and twin rear doors that open to 180 degrees. The DELIVER 7's cabin is designed to be more car-like than a traditional commercial vehicle, focusing on comfort and connectivity. Standard features often include a 12.3-inch high-definition touchscreen infotainment system with Apple CarPlay and Android Auto integration. Driver comfort is enhanced by a 10-way adjustable driver's seat, heated front seats for both driver and passengers, and a heated steering wheel. For safety and convenience, the van is well-equipped with a 360-degree camera system, front and rear parking sensors, Autonomous Emergency Braking, Lane Departure Warning, and adaptive cruise control. The vehicle is protected by a 5-year manufacturer's warranty. Speak to our expert sales team today to learn more.
