Description

Step into the world of zero-emission utility with this impressive Maxus eDELIVER 9 CC L3 65 KWH Dropside. This is the long-wheelbase chassis cab version, professionally fitted with a UKTB dropside body, making it the perfect tool for construction, landscaping, or logistics businesses operating in city centres and Ultra Low Emission Zones. The Dropside conversion provides unparalleled flexibility for loading and unloading bulky or heavy items from three sides, backed by the practicality of a large commercial electric vehicle. Powering this capable workhorse is a highly efficient 65 kilowatt-hour battery, providing a dependable driving range ideal for all but the longest daily routes. Charging is quick and convenient, supporting both AC and DC rapid charging to minimise downtime and keep your

business moving. The electric powertrain delivers instant torque for a smooth, quiet, and responsive driving experience that drastically lowers your running and maintenance costs compared to a traditional diesel van. This vehicle is classified as an N2 category, meaning it has a Gross Vehicle Mass greater than 3,500 kilograms, offering an enhanced payload capability for serious commercial use. Inside the spacious cabin, the eDELIVER 9 is equipped with modern comforts designed to make your working day easier. Features commonly found in this model include a large touchscreen infotainment system, Apple CarPlay and Android Auto compatibility, and a reversing camera to assist with tricky manoeuvres on site. Driver comfort is assured with an eight-way adjustable driver's seat and air conditioning. Safety is paramount, with a suite of assistance systems such as Autonomous Emergency Braking and Lane Departure Warning often included as standard. Finished with the durable, high-quality UKTB dropside body, this Maxus is ready to join your fleet and contribute to a cleaner, more efficient operation from day one.
