Description

The Maxus eDeliver 3 Short Wheelbase panel van, featuring the larger 50.52 kilowatt-hour battery, is a compact electric workhorse built for efficiency and city operations. It was designed from the ground up as an electric vehicle, utilising lightweight aluminium and composite materials to maximise its payload of 945 kilograms. This focus on efficiency delivers a combined WLTP range of 151 miles, which can extend to an urban city range of up to 213 miles, making it an ideal choice for businesses operating in emission zones. This SWB model offers a practical cargo volume of 4.8 cubic metres, accessed by a sliding side door and rear double doors. Its compact dimensions, including a length of 4555 millimetres and a turning circle of just 5.87 metres, ensure excellent manoeuvrability in busy urban environments. For added convenience, rapid DC

charging allows the battery to reach 80 percent capacity in approximately 45 minutes. The cabin is equipped with essential features such as a 7 or 8 inch touchscreen infotainment system with smartphone integration, a reversing camera, and rear parking sensors. Peace of mind is provided by the comprehensive five year vehicle warranty and an eight year battery warranty. Price inclusive of government OZEV grant at £5,000. OZEV grant subject to Government approval and can be changed or withdrawn, without notice, at any time.
