Description

This 2025 MAXUS eDeliver 9 is a 72kWh Crew Van Auto FWD L3 H2 5dr model that runs entirely on electric power. As a nearly new vehicle, it has covered only 10 miles, representing a very low mileage for its age. This van is designed to offer a modern solution for those seeking an efficient and capable electric commercial vehicle. The eDeliver 9 stands out with a powerful 201 bhp engine, providing robust performance for daily tasks. It offers a substantial cargo volume of 11,000 litres, ensuring plenty of space for equipment or goods. The 72 kWh battery provides a maximum range of 146 miles when new, and it supports flexible charging options to suit different schedules. You can charge the vehicle at home in 11 hours and 6 minutes using a 7kW charger, or utilise a public rapid charger to go from empty to 80 percent in just 53 minutes. These specifications combine to make this van a practical and efficient choice for business needs.
