Description

This 2026 MAXUS eDeliver 5 is presented with an exceptionally low mileage of just 2 miles, indicating it is practically new and has had only one owner. This electric van, in the 64kWh Auto L1 6dr derivative, boasts a substantial 64 kWh battery capacity, offering a maximum range of 208 miles on a full charge. For convenience, it can achieve an 80% charge in as little as 48 minutes at a public charging station. Notable features include a detachable front tow hook with an integrated towbar, adaptive cruise control for relaxed journeys, and a 360 around view system for effortless parking. Inside, you'll find heated front seats for comfort and air conditioning to maintain a pleasant cabin temperature. The MAXUS eDeliver 5 stands out with its impressive 161 bhp electric engine power, providing a responsive driving experience. The highlighted 208 mile range is a significant advantage, allowing for extended use between charges compared to many other electric vehicles. Coupled with its very low mileage and single owner provenance, this eDeliver 5 represents a superb choice for those seeking a modern,

efficient, and well equipped electric van.
